

ACX Virtual Credential Platform (VCP)

ACX Virtual Card Platform is a web based application which can be installed on internet or intranet, administrator no matter can create, delete, expire the virtual card, but also re-use the virtual card once the virtual card is de-activated successfully.

The unique activation code will be sent to user by email, after user input the activation code in the ACX mobile access APPS, the user's mobile becomes a virtual card, the APPS can output the card number by of Bluetooth and/or scramble QR code technology.

- VCP is a WEB based application on internet or intranet
- Admin password for operation
- Engineer password for Bluetooth reader configuration
- Virtual Card number has expiry date
- Virtual Card number can be re-used
- On-line enquiry by different filter conditions
- Max. 64 bits card number length and any card number formats
- Unique activation code for each virtual card number generation
